Professional Summary

AWS Certified Solutions Architect (Associate) and Computer Science undergraduate at VIT Bhopal, specializing in Cloud Computing and Automation. Experienced in building and deploying production-grade full-stack applications using the MERN stack and AWS (EC2, S3, Lambda, IAM), with a strong track record across RBAC systems, payment pipeline engineering, and open-source contributions (GSSoC 2026 – two merged PRs, one labeled level:advanced by maintainers). Consistently delivers scalable, secure APIs and cloud-optimized architectures with measurable impact.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, C++, SQL

Web Technologies: React.js, Next.js, Node.js, Express.js, RESTful APIs, JWT, Tailwind CSS

Cloud and DevOps: AWS (EC2, S3, Lambda, IAM), Git, GitHub

Databases: MongoDB (Mongoose), MongoDB Atlas, MySQL

Core Concepts: Data Structures and Algorithms, OOP, DBMS, System Design, RBAC Architecture, Computer Networks

Projects

devBoard | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS* | [GitHub](#) | [Live Demo](#) *Apr 2026*

- Built a developer-centric productivity platform combining Kanban sprint execution, syntax-highlighted code snippets, Markdown notes, and multi-project dashboards – a lightweight Jira/Notion alternative for solo developers.
- Implemented drag-and-drop Kanban (Backlog to In Progress to Code Review to Done) using dnd-kit with smooth, accessible interactions; implemented algorithmic complexity tagging ($O(1)$ to $O(n^2)$) for task estimation and prioritization.
- Delivered a 16+ endpoint REST API across projects, tasks, sprints, and file attachments; secured with JWT and bcrypt, designed with S3-ready file upload support for production scale.

Saahaya | *React.js, Node.js, MongoDB, Razorpay, Cloudinary, PDFKit, Nodemailer* | [GitHub](#) | *Jan 2026 – Present*

- Engineered a secure Razorpay payment pipeline with HMAC-SHA256 signature verification and webhook handling to ensure reliable, tamper-proof transaction processing.
- Automated 80G tax receipt generation using PDFKit and atomic MongoDB counters, with instant email delivery via Nodemailer and SendGrid – eliminating manual receipt processing entirely.
- Implemented a 3-tier RBAC system (Donor, NGO, Admin) protecting 25+ REST API endpoints using JWT middleware and role-based access control; integrated Cloudinary for validated NGO document storage.

SkillSwap | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS* | [GitHub](#) *Jan 2026*

- Built a skill exchange platform with a time-credit economy (1 hour served equals 1 credit earned); implemented JWT-secured route separation with React AuthContext for global session management.
- Developed 5+ RESTful API endpoints with ownership-based access control and designed scalable MongoDB schemas with indexed query paths for efficient concurrent access.

Experience

Open Source Contributor – GirlScript Summer of Code (GSSoC) *2026*
Remote *India*

- Contributed an architecture-level AWS S3 optimization to InternHack (production MERN SaaS, 74+ GitHub stars) – migrated server-side Multer buffering to S3 pre-signed URL uploads, reducing backend processing overhead and improving upload scalability; PR labeled level:advanced, type:performance, type:security by maintainers.
- Delivered a second merged UI contribution to OPSCORD, a Discord-like open-source platform, implementing a production-grade custom 404 page aligned with the project's industrial design system.

Open Source Contributions

InternHack | *Node.js, TypeScript, AWS S3, React.js* | PR #310 – Merged | GSSoC 2026 *May 2026*

- Migrated server-side Multer file uploads to AWS S3 pre-signed URL uploads, reducing backend processing overhead and improving upload scalability; PR merged and labeled level:advanced, type:performance, type:security by maintainers.
- Delivered a reusable uploadDirectToS3 TypeScript utility adopted across 4+ frontend modules; built a secured presigned-URL endpoint with UUID-based per-user S3 key namespacing.

OPSCORD | *Next.js, TypeScript, Tailwind CSS* | PR #44 – Merged | GSSoC 2026 *May 2026*

- Delivered a merged production UI contribution – built a custom industrial-themed 404 page (app/not-found.tsx) with a terminal-style error panel, animated warning section, and responsive layout using existing project theme variables and lucide-react icons; PR merged by maintainer.

Education

Bachelor of Technology – Computer Science (Cloud Computing and Automation) Sep 2023 – May 2027
VIT Bhopal University *Bhopal, India*

- **CGPA: 8.84 / 10.0** Relevant Coursework: Data Structures and Algorithms, Operating Systems, Computer Networks, DBMS, Cloud Computing

Senior Secondary – Science (CBSE) Graduated 2022
Surendranath Centenary School *Ranchi, India*

- Completed senior secondary with focus on Physics, Chemistry, and Mathematics.

Certifications

AWS Certified Solutions Architect – Associate *Apr 2026*

NPTEL Cloud Computing and Distributed Systems – Silver and Elite *Apr 2026*

NPTEL Internet of Things (IoT) – Gold and Elite Distinction *2025*

Achievements and Activities

GSSoC 2026: Two merged PRs – AWS S3 architecture contribution to InternHack labeled level:advanced, type:performance, type:security by maintainers; production UI contribution to OPSCORD.

Competitive Cricket: Represented school and higher competitive teams at U-16, U-17, and U-19 levels; higher-level competitive match performances featured multiple times in newspapers (2011 – Present).
