Education

VIT Bhopal University

Bhopal, India

B.Tech in Computer Science and Engineering (Cloud Computing and Automation)

Sep 2023 – May 2027

- **CGPA:** 8.77 / 10.0

Surendranath Centenary School

Ranchi, India

Senior Secondary (CBSE)

2022

Technical Skills

Languages: JavaScript (ES6+), Python, C++, SQL

Frontend: React.js, Tailwind CSS, RESTful API

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Databases: MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM), Git, GitHub

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Computer Networks

Experience

Open Source Contributor

Remote, India

GirlScript Summer of Code (GSSoC) 2026

May 2026

- Eliminated a centralized file-upload bottleneck in InternHack, a production MERN SaaS platform (74+ GitHub stars), by architecting a distributed, server-bypassing upload flow using AWS S3 pre-signed URLs, removing buffered server load and improving fault tolerance under concurrent uploads
- Shipped the fix as a production PR merged and labeled **level:advanced**, **type:performance**, and **type:security** by project maintainers, reflecting senior-level review sign-off on architecture, performance, and security impact
- Built a reusable `uploadDirectToS3` utility adopted across 4+ frontend modules and a secured presigned-URL endpoint with UUID-based per-user S3 key namespacing to prevent key collisions and unauthorized access
- Ramped up in an unfamiliar codebase to deliver a second merged production contribution to OPSCORD (Discord-like open-source platform), building a custom industrial-themed 404 page with a terminal-style error panel matching the project's existing design system

Projects

devBoard | *React.js, Node.js, Express.js, MongoDB, JWT, AWS S3, Tailwind CSS*

Apr 2026

- Engineered a full-stack developer productivity platform, owned end-to-end from design to deployment, combining Kanban sprint execution, syntax-highlighted code snippets, Markdown notes, and multi-project dashboards as a lightweight Jira/Notion alternative
- Architected a 16+ endpoint REST API designed for horizontal scalability with S3-ready file storage, enabling the system to scale usage without structural rework
- Implemented accessible drag-and-drop Kanban workflows (Backlog → In Progress → Code Review → Done) using `dnd-kit`, adding algorithmic complexity tagging ($O(1)$ – $O(n^2)$) for task prioritization and improved usability

SkillSwap | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS*

Jan 2026

- Built a full-stack skill-exchange marketplace with a time-credit economy, independently owning product design, backend architecture, and frontend implementation
- Developed 5+ RESTful API endpoints with ownership-based access control and JWT-secured route separation via `React AuthContext`, strengthening application security and session management
- Designed scalable MongoDB schemas with indexed query paths to support efficient concurrent access as user load grows

Certifications

AWS Certified Solutions Architect – Associate

Apr 2026

NPTEL Cloud Computing and Distributed Systems | *Silver and Elite*

Apr 2026

NPTEL Internet of Things (IoT) | *Gold and Elite Distinction*

2025

Achievements

Represented school and higher competitive cricket teams at U-16, U-17, and U-19 levels; performances featured in newspapers multiple times
